

PAGES

Welcome Page

The welcome page requires the user to enter their property details before the app can be used.

- Name
- Address
- PIC#
- Property/Nick Name

Home Page

The home page displays a calendar and outstanding records below, buttons include:

- New Movement
- New Equine
- Edit Equine
- New Destination
- Edit Destinations
- Edit Home Address
- Email List
- Records

The calendar should also include dots (which are colour coded to identify the animal) for a visualisation of records. The outstanding records allows for a return entry to be created which is auto populated with the initial record, redirecting to the Check Details page.

New Equine

This page allows for creation of new equines – the limitations of this page will depend on the subscription.

- Horse Name: (Mandatory Field)
- Microchip:
- Brand:
- Colour:
- Markings:
- Class: Mare | Stallion | Gelding (Mandatory - Selection)
- Breed:
- Colour Coding: (Display a colour pallet – Mandatory)

Mandatory to select at least one identifier (Microchip/Brand/Colour)

Edit Home

This page allows for the details entered on the welcome page to be amended.

Record

This page allows for a history of records

Open Record Page

This page allows for existing records to be downloaded (pdf) or emailed. Redirection **Page 4 New Movement**

New Movement

This is a heading only to the following sequence of pages as it is the main functionality of the app.

1. PAGE ONE

This page displays all options to be compiled into the final PDF. Including **Horses**; which have been added to “New Horse” as buttons which are colour coded as allocated, **Origin**; which include both the home address and destinations, **Destination**, which include both the home address and destination options also. Multiple horses can be added however only a single origin and destination can be selected.

2. PAGE TWO

This page displays a visual calendar to select the date of travel as well as an entry option where the user can numerically enter the date. By default the date will be select to the date of entry and the numerical entry and visual option will automatically change to reflect one another. This page will also include an option to create a duplicate record for a return trip which will display the travel on the home page as stated above.

3. PAGE THREE

This page provides an overview of the entries so far with options to edit (return to previous page as required).

4. PAGE FOUR

This page provides the option to download the details into the PDF or email the PDF.

New Destination

This page allows for creation of new destinations – the imitations of this page will depend on the subscription the user has selection.

- Individual's name:
- Business Name:
- Address:
- PIC#
- Property/Nick Name:

Email List

This page displays existing emails saved and provides a data entry field to add a new email to the list.
This email list displays on page 4 of **New Movement**.
