

Techlink

Consulting Australia

This venture has been started with an aim to structure, streamline, and help implement agile project management practices in IT projects.

With a team of a dedicated project manager, designers and developers, we thrive to contribute to the tech world with not just our technical expertise but exceptional time, quality, stakeholder, and risk management skills.

Our focus -Innovation with Efficacy.

Technology Stack

Android

- Java Technologies, Constraint Layout and XML

IOS

- We use Auto - Layout and Swift 3

Backend Technology

- Node JS Technologies - Express JS framework

Advantages of Express.js

ExpressJS is a prebuilt NodeJS framework that can help you in creating server-side web applications faster and smarter. Simplicity, minimalism, flexibility, scalability are some of its characteristics and since it is made in NodeJS it inherits the performance of it.

Database

- Mongo Db and SQL
